ERRATA

In the abstract of the paper by Dr. Z. BRENER entitled "Chemotherapy of Experimental Schistosomiasis. III Comparative Drug Activity of Some Antimonial Compounds in Mice experimentally infected with *Schistosoma mansoni*", published in this *Bulletin*, 1961, v. 58, 338, the sentence beginning on the second line should read: "After 35 days they were treated with drugs by intraperitoneal injection daily for 5 days: after 5 days' rest they received a second course of treatment lasting for 5 days and were killed for examination 7 days after the last dose of this second series".

In the review of **Recent Advances in Tropical Medicine** which appeared in the *Tropical Diseases Bulletin*, 1961, v. 58, 765, the following passage appears on p. 766, para. 2:

"The accepted full dosage of diaminodiphenyl sulphone for leprosy (p. 263) is 300 mgm. twice weekly—not 100 mgm. twice weekly as stated".

This was inferred from a passage in the second paragraph on p. 263 of the book.

It has now been pointed out that earlier in this section of the text (p. 262) the author of this part of the book clearly states that DDS is "slowly increased to a maximum of 800 mg. weekly". The passage in the review quoted above should therefore be deleted.

The names PAYAN, H., SAUTET, J. & ALDIGHIERI, J. R., authors of the paper on "Pathology of *Plasmodium berghei* Infections in White Mice on Different Dietary Régimes", this *Bulletin*, 1961, v. 58, 780, should read: PAYAN, H., SAUTET, J., ALDIGHIERI, J. & ALDIGHIERI, R.

In the abstract of the paper by ADAM, HAMON and BAILLY-CHOUMARA published in this *Bulletin*, 1961, v. 58, 992, the passage in the second paragraph, p. 993, which begins "Since the gametocyte rates of both susceptible and resistant *A. gambiae* were essentially similar . . ." should read "Since the gametocyte rates of people in the treated and untreated villages were essentially similar . . .".
